

# SPARFELL - A SPECTRUM OF SOLUTIONS

**T**he world is constantly changing and never fails to present new challenges and opportunities in the way clients consume products and services.

The private aviation sector is no exception to this rule, and SPARFELL continuously strives to adapt to changing market dynamics and client expectations, by innovatively offering all solutions under the same roof.

## Synergy

From consulting, trading, management, design and lifestyle SPARFELL is one of the few companies world-wide that offers such a wide selection of services under one roof to ultimately better serve its customers. With expertise in all types of aircraft, whatever a client's need is in aviation, SPARFELL provides a global solution. This synergy within all realms of business aviation offers clients a comprehensive guidance to their multiple needs.

## Neutrality

Currently managing eighteen different types of aircraft SPARFELL can tailor to your needs not only in theory but also in practice. Having

*A Gulfstream G500, the 18th aircraft type to enter SPARFELL's Charter Fleet*

years of savoir-faire, we understand every need or want to own an aircraft is special and requires an independent assessment. For this reason, SPARFELL offers clients an unbiased, neutral and objective oversight solution, as well as a mission profile for the purchase, sale, upgrade, maintenance and operations of business jets, airliners and helicopters.

## Ethics

SPARFELL remains one of the few privately held, family-managed companies operating in business aviation. This gives SPARFELL the freedom to exclusively focus on its customers' interests, to have a long-term

vision and to be flexible, thanks to immediate decisions by people solely focused on the industry. With its two operational centers in Switzerland and Austria, indisputably stable countries, SPARFELL is proud of its independence and neutrality, especially towards manufacturers, maintenance centres, fuel providers and insurance providers. This is the only way SPARFELL can guarantee its customers the best value for money.

“SPARFELL is the result of many passionate people working together to create a synergy of different professions of expertise in aviation and beyond to respond to a clientele that wishes to have trust.

As a result, there is a real flexibility in our company structure on the part of our employees, but above all, a strong link between our teams and our clients.

These human relationships allow us to perpetuate our achievements while developing our future markets. ”

Edward Queffelec - CEO of SPARFELL

### Sustainability

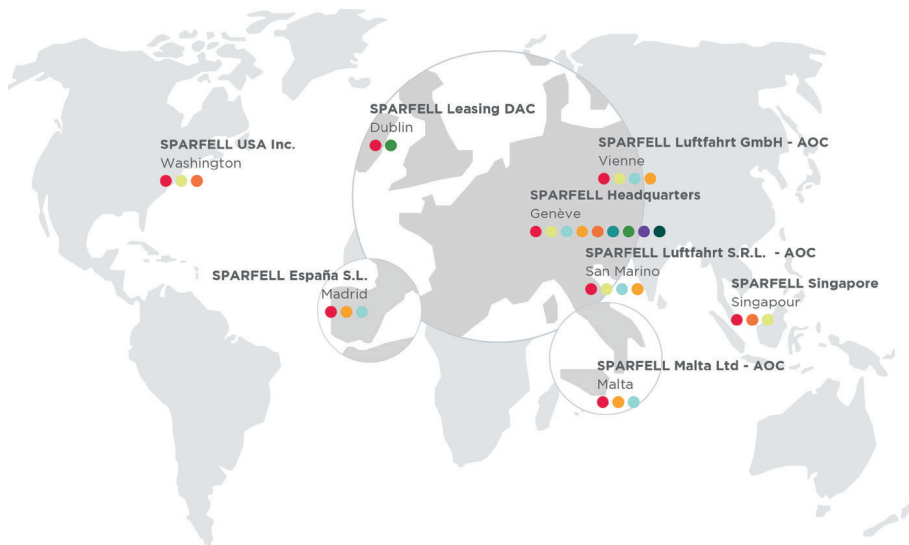

Proud of what we do and the everyday environmental progress we are part of, SPARFELL constantly encourages new standards and innovation in the industry.

Championing the adaptation to Sustainable Aviation Fuel (SAF), the

most promising solution to reduce carbon emissions in aviation, SPARFELL is now offering book & claim solutions to all our clients.

Alongside those innovations, SPARFELL has launched its foundation, Fly for Water. Its purpose is to allow

access to clean water to communities in need. As the mother project currently develops in Madagascar, the foundation will continue to grow globally.
